LANGUAGES

English
Technical reading

SKILLS

Languages
JavaScript, TypeScript, PHP, Java

Frameworks
React, Next.js, React Native, Laravel, Node.js

Data & API
Data structures, PostgreSQL, MySQL, SQL Server, MongoDB, REST API, WebSocket

Tools
Linux, Docker, Git, Redux, React Query

AI-assisted
Cursor, OpenAI Codex, Antigravity, MCP

EDUCATION

Cao Thang Technical College
Information Technology
2018 – 2021

SUMMARY

Full-Stack Developer with 4+ years of experience, IT graduate. Strong in JavaScript/TypeScript, React, Next.js, React Native, and PHP/Laravel; also experienced with Java, REST APIs, SQL, Docker, and Git/GitHub. Has shipped and operated applications in production (web and Google Play).
Solid programming fundamentals and data structures; logical, careful with business data. Uses AI to speed up day-to-day work.

EXPERIENCE

Full-Stack Developer 03/2022 – 08/2026
Intercontinental Computer Science Co.

- Built web and mobile features for outsourcing projects: React, Next.js, TypeScript, React Native; integrated REST APIs, authentication, and realtime data.
- Developed Laravel/PHP and Node.js backends/admin (PostgreSQL, MySQL, MongoDB); Redux; Dockerized services; collaborated via Git, GitLab/GitHub, Jira.
- Used Cursor, OpenAI Codex, and Antigravity to speed up implementation, refactoring, debugging, and review.

Achievements

- Helped deliver projects on schedule (Bitgert Exchange, Zogux Exchange, and others), contributing to team project bonuses / outstanding-performance awards for meeting committed delivery timelines.

Selected client projects

Kunux Webapp 06/2026 – 08/2026 | 2-person team

Tech: Next.js, React, TypeScript, Node.js, PostgreSQL, Docker, Traefik

Managed hosting platform: deploy software to a VPS, choose provider, region, and machine size, then bring the service live.

- Built the create-service flow: software template, VPS provider (Hetzner, Linode), region/datacenter, instance size, and deploy (Docker, Traefik).
- Built Bring Your Own VPS (BYO VPS) so customers can connect an existing VPS or rent infrastructure, then build and deploy projects on that machine.

Zogux Exchange 04/2026 – 06/2026 | 4-person team

Tech: React, TypeScript, Jira, GitLab, Figma

Web crypto exchange: market data, order placement, and account management.

- Built React/TypeScript trading UI from Figma to polish the trading experience.
- Integrated backend APIs (markets, orders, accounts) and fixed UI-API issues during handover.
- Delivered features from Jira assignments, tracked in GitLab; shipped on time and received a performance award.

PouchPay Wallet 03/2025 – 08/2026 | Solo

Tech: Android (Java/Kotlin), iOS (Swift), Web3 dApp Browser, Realm, SQLite, Figma

Mobile crypto wallet: store and send/receive tokens on Ethereum networks, with a Web3 dApp browser. Released on Google Play and the App Store.

- Adjusted layouts from Figma; built features to spec, fixed bugs, and produced Android/iOS release builds.
- Supported the client during development and adjusted the product from feedback and new requests.

Bitgert Exchange 12/2022 – 02/2023, 2025 | Solo

Tech: React Native, WebSocket, Redux, REST API

Mobile crypto exchange: 30+ coins, 0% trading fees, realtime prices and order books. Live on Google Play (100K+ downloads, 4.1/5).

- Built the React Native app: REST APIs, realtime WebSocket data, Redux state; shipped to Google Play in late 2022 – early 2023.
- In 2025, updated the UI per client request. Both phases were delivered on time and received project bonuses.

Google Play: play.google.com/store/apps/details?id=exchange.bitgert.app

Xelex Technology Company

- Built ERP features with .NET, C#, ASP.NET, Angular, and SQL Server; connected Angular UI to C# APIs and wrote SQL Server queries.

OTHER PROJECTS

- **Booking LNT (05/2026 – 07/2026):** Office desk, seat, and meeting-room booking. Next.js, Go, PostgreSQL — Figma UI, FE/BE features, APIs, client support, production deploy.
- **Fliam (03/2022 – 03/2024):** Freelance marketplace (gigs, orders, profiles). Laravel, PHP, MySQL — Figma page updates; BE/FE features per lead requests.
- **E-commerce (2026 – 08/2026, personal):** Storefront and admin: catalog, cart, orders, VNPay. Next.js, Laravel, PostgreSQL. github.com/phuongnamngo/shop-ecommerce
- **NexDAX App (09/2023 – 08/2026):** Crypto exchange mobile app. React Native, Node.js, MongoDB, Redux — realtime list performance.
- **Dapp Taptap Telegram (03/2026 – 04/2026):** Telegram Mini App with tap-to-earn and referrals. React, TypeScript, Node.js, MongoDB.

AI WORKFLOW

- Use Cursor Agent, OpenAI Codex, Hermes Agent, and Antigravity for implementation, refactoring, debugging, and code review.
- Plan from specs and MCP before implementing features.
- Review, test, and validate AI-generated code before integration.
- Use AI for codebase analysis, documentation, and technical research.
