SUMMARY

Full-Stack Developer with 4 years of experience building web and mobile products using Laravel, Node.js, React, Next.js, and React Native, plus working-level exposure to Flutter through real production work. Strong proficiency in TypeScript across both frontend and backend development.

Proactively leverages AI-augmented development workflows — Cursor, Antigravity, OpenAI Codex, Hermes Agent, and MCP — to accelerate delivery and improve code quality.

SKILLS

AI Dev Workflow	Cursor, Antigravity, OpenAI Codex, Hermes Agent; MCP & agentic workflows for code review and querying large-scale codebases
Languages	JavaScript & TypeScript, PHP
Frontend / Mobile	ReactJS, Next.js, React Native
Backend	Laravel, Node.js
Database	PostgreSQL, MySQL, MongoDB
DevOps / Cloud	Docker, Git/GitHub, Linux, Google Cloud Platform
Spoken Languages	English: Reading/Writing – Intermediate (comfortable with technical documentation)

WORK EXPERIENCE

Intercontinental Computer Science Co. 03/2022 - 09/2026

Fullstack Developer

Worked as a fullstack developer in an outsourcing model, handling multiple concurrent client engagements — from feature development to production deployment and post-release support.

- Built React Native mobile apps: navigation, Firebase, push notifications, Redux state management, and Google/Facebook/Apple login integration.
- Contributed to blockchain fullstack React/Next.js projects (exchange, wallet platforms) with a Go backend; hands-on with Docker and production deployment pipelines.
- Applied AI agents (Cursor, Antigravity, OpenAI Codex, Hermes Agent) across projects to speed up feature development and automate code review.

Selected client projects:

Webapp Kunux (06/2026 – Present, client project, 2-person team) — Full-Stack Developer Self-hosted Platform-as-a-Service (PaaS) simplifying deployment and management of applications and databases.

Tech Stack: Next.js, React, TypeScript, Node.js, PostgreSQL, Docker, Traefik

- Built UI components from Figma designs; managed deployment of existing services across VM hosting providers.
 - Used AI agents to accelerate feature delivery, cutting release cycle time by ~30%.
 - Website: <https://app.kunix.com>
- Booking LNT** (05/2026 – 07/2026, *client project, solo*) – Full-Stack Developer Enterprise workspace booking system for desk sharing and meeting room reservations.
- Tech Stack:** Next.js, React, TypeScript, Go, PostgreSQL, Docker
- Delivered features directly from customer requirements and supported existing clients after launch.
 - Owned end-to-end deployment to production.
 - Website: <https://booking.Intpartners.com>
- Zogux Exchange** (04/2026 – 06/2026, *client project, 4-person team*) – Frontend Developer Decentralized exchange (DEX) platform for cryptocurrency trading.
- Tech Stack:** React, TypeScript, Jira, GitLab
- Built UI components from Figma designs and integrated APIs in close collaboration with the backend team.
 - Website: <https://app.zogux.com>
- PouchPay Wallet** (03/2025 – Present, *client project, solo*) – Mobile App Developer Blockchain wallet platform compatible with TokenScript, a tokenization framework for token-based assets.
- Tech Stack:** Android (Java/Kotlin), iOS (Swift), Web3 dApp Browser, Realm, SQLite
- Shipped to both Google Play and the App Store; maintain ongoing feature development and support.
 - ChPlay: <https://play.google.com/store/apps/details?id=global.alltra.app> | App Store: <https://apps.apple.com/us/app/pouchpay-alltra-wallet/id6748115292>
- Other client engagements:**
- **NexDAX App** (09/2023 – Present, *2-person team*) – React Native, Node.js, MongoDB. Mobile app for a cryptocurrency exchange platform(ChPlay: <https://play.google.com/store/apps/details?id=com.nexdax>).
 - **Dapp Taptap Telegram** (03/2026 – 04/2026, *solo*) – React, TypeScript, Node.js, MongoDB. Telegram Mini App with a tap-to-earn and referral system.
 - **Balance Distribution App** (09/2024 – 01/2025, *2-person team*) – React Native, Odoo (Python), Firebase. Agricultural product sales app; shipped to both Google Play and the App Store.
- Fliam – Web Developer**
- 03/2022 – 03/2024** (*client project under Intercontinental Computer Science Co.*)
- Freelance services marketplace connecting clients with freelancers.
- Tech Stack:** Laravel, PHP, MySQL, Blade, HTML/CSS, Tailwind CSS
- Developed backend modules and admin-facing features using Laravel/PHP with a MySQL database.
 - Built responsive frontend views using Blade templating and Tailwind CSS.
 - Website: <https://fliam.com>

Xelex Technology Company 03/2021 - 09/2021

Intern/Fresher Developer

- Interned as a developer building basic features for an ERP system using .NET, C#, ASP.NET, and SQL Server.
- Worked with Angular, integrated business logic with backend C# APIs, and wrote SQL Server queries.
- Managed source code with SourceTree (Git) and participated in team code reviews.

EDUCATION

Cao Thang Technical College 09/2018 - 12/2021
