LANGUAGES

English
Technical reading

SKILLS

Languages
PHP, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & architecture
Laravel, OpenCart (MVC), OOP, REST API

Databases
MySQL, PostgreSQL, SQL Server

Ops & tools
Linux, Docker, Git, GitLab/GitHub, Nginx

Other
React, Next.js, React Native, Redux, FCM

AI-assisted
Cursor, OpenAI Codex, Antigravity, MCP

EDUCATION

Cao Thang Technical College
Information Technology
2018 – 2021

SUMMARY

PHP Developer with 4+ years of website development. Strong in plain PHP and MVC (Laravel, OpenCart), OOP, HTML, CSS, JavaScript, MySQL/PostgreSQL, and REST APIs. Has analyzed requirements, built features, fixed bugs, maintained sites, and shipped them with the design team. Uses Cursor, OpenAI Codex, and AI agents to speed up implementation, refactoring, and debugging, and reviews generated code before integrating it.

EXPERIENCE

Full-Stack Developer 03/2022 – 08/2026
Intercontinental Computer Science Co.

- Developed and improved websites in plain PHP and MVC (Laravel, OpenCart): features, MySQL/PostgreSQL queries, REST APIs, and HTML, CSS, JavaScript UI.
- Joined requirement analysis and built features to the project brief; worked with the lead, design (Figma), and content teammates to finish the sites.
- Fixed bugs and maintained live websites: data checks, incident handling, and stable operation. Deployed with Docker on Linux; used Git, GitLab/GitHub, and Jira.

Achievements

- Helped deliver projects on schedule (Zogux Exchange, Bitgert Exchange, and others), contributing to team project bonuses / outstanding-performance awards for meeting committed delivery timelines.

Selected client projects

Fliam 03/2022 – 03/2024 | With team lead

Tech: Laravel, PHP, MySQL, HTML/CSS/JavaScript
Freelance marketplace: gigs, orders, and user profiles — a web business-admin system on MVC. fliam.com

- Built PHP/Laravel backend and frontend features with MySQL per lead requests; updated pages from Figma.
- Developed order, profile, and gig areas as assigned; supported production and fixed issues as they came up.

Care For Vietnam 04/2022 – 09/2022 | Web with team; Android/iOS app

Tech: OpenCart, PHP (MVC), REST API, React Native, Redux, FCM
OpenCart PHP MVC commerce site (formerly New Image Vietnam, now careforvietnam.vn) and the CareFor CSKH customer-care app on Google Play.

- 04/2022 – 06/2022: Worked with the team to fix bugs, check data, and support operations of the OpenCart PHP MVC site.
- 06/2022 – 09/2022: Designed REST APIs on the existing OpenCart codebase and built the React Native app (Redux, FCM) for Android and iOS, then handed it to other team members.

Google Play: play.google.com/store/apps/details?id=vn.careforvietnam.appcrm

Zogux Exchange 04/2026 – 06/2026 | 4-person team

Tech: React, TypeScript, Jira, GitLab, Figma

Web crypto exchange: market data, order placement, and account management.

- Built React/TypeScript trading UI from Figma to polish the trading experience.
- Integrated backend APIs (markets, orders, accounts) and fixed UI-API issues during handover.
- Delivered features from Jira assignments, tracked in GitLab; shipped on time and received a performance award.

Bitgert Exchange 12/2022 – 02/2023, 2025 | Solo

Tech: React Native, WebSocket, Redux, REST API

Mobile crypto exchange: 30+ coins, 0% trading fees, realtime prices and order books. Live on Google Play (100K+ downloads, 4.1/5).

- Built the React Native app: REST APIs, realtime WebSocket data, Redux state; shipped to Google Play in late 2022 – early 2023.
- In 2025, updated the UI per client request. Both phases were delivered on time and received project bonuses.

Google Play: play.google.com/store/apps/details?id=exchange.bitgert.app

PREVIOUS EXPERIENCE

Intern / Fresher

03/2021 – 09/2021

Xelex Technology Company

- Built ERP features (.NET, C#, ASP.NET, Angular, SQL Server): connected UI to APIs, wrote queries, and helped process business data on an enterprise admin system.

OTHER PROJECTS

- **Kunux Webapp (06/2026 – 08/2026)**: Managed hosting: deploy software to a VPS. Next.js, PostgreSQL, Docker, Traefik — create-service flow and BYO VPS. app.kunux.com
- **PouchPay Wallet (03/2025 – 08/2026)**: Mobile crypto wallet with a Web3 dApp browser. Android/iOS — Figma layouts, features, release builds. Google Play and App Store.
- **Booking LNT (05/2026 – 07/2026)**: Office desk, seat, and meeting-room booking. Next.js, Go, PostgreSQL — Figma UI, FE/BE features, APIs, client support, production deploy.
- **E-commerce (2026 – 08/2026, personal)**: Storefront and admin: catalog, cart, orders, VNPay. Next.js, Laravel, PostgreSQL. github.com/phuongnamngo/shop-e-commerce
- **NexDAX App (09/2023 – 08/2026)**: Crypto exchange mobile app. React Native, Node.js, MongoDB, Redux — realtime list performance.
- **Dapp Taptap Telegram (03/2026 – 04/2026)**: Telegram Mini App with tap-to-earn and referrals. React, TypeScript, Node.js, MongoDB.

AI WORKFLOW

- Use Cursor Agent, OpenAI Codex, Hermes Agent, and Antigravity for implementation, refactoring, debugging, and code review.
- Plan from specs and MCP before implementing features.
- Review, test, and validate AI-generated code before integration.
- Use AI for codebase analysis, documentation, and technical research.
